

**State Library of North Carolina
Guidelines for Multiyear LSTA Grants
2004-2005**

The *Library Services & Technology Act Plan for Implementation in North Carolina, 2003-2007*, (page III-7,8) includes the following language about multiyear grants:

Beginning with requests for funding during the 2004-2005 year, applicants may propose multiyear projects for selected Project Grant and Innovation Grant programs. The following policies and procedures will guide the implementation of this option:

- *Grant program guidelines will specify whether multiyear grants are an option for applicants.*
- *Multiyear Project and Innovation Grants will be funded for a maximum of three years.*
- *No project will be guaranteed funding for the second and third years. Factors that will determine funding in second and third years include the availability of federal funds and the grantee's effectiveness in managing the project and in providing required reports to the State Library.*
- *Projects designed to develop new services must demonstrate long-term sustainability that meets specific requirements described in the grant program guidelines.*

Guidelines for Multiyear Grants

1. **Purpose:** Multiyear grants will allow grantee libraries sufficient time to:
 - develop a sustainable program or service
 - test a concept
 - undertake a project that is too complex to complete in one year
2. **Affected Grant Programs:** Multiyear implementation will be an option for those grant programs that fund more complex projects aimed at helping grantees develop new programs, services, or products. For 2004-2005, only two grant programs will be eligible for multiyear applications: Community-Centered Outreach Services and NC ECHO Heritage Partners. Other categories may be added in future years.
3. **Proposal Requirements.** In addition to the requirements for any grantee in those categories, multiyear applicants will be asked to provide:
 - information about outcomes, action plans, timelines and estimated budget for each year of the project, including milestones or checkpoints that will demonstrate progress toward the ultimate project outcome;
 - a plan for long-term sustainability of the service or program.
4. **Requests for Funding:** Applicants for multiyear grants may apply for up to the maximum amount of funds allowed each year for that grant program.
5. **Matching.** Requirements for match will be the same as for single year projects in the grant program and will remain the same for each project year.

6. Funding commitment. The initial approval of a multiyear project does not guarantee funding for future years, but does assume the project will have priority over new proposals in subsequent years if:
 - federal funds are available;
 - the required match from local sources is available;
 - the project is being implemented as proposed; and
 - the project is being managed according to federal requirements and according to terms of the grant agreement.
7. Briefings, Monitoring & Future Applications. A library that receives a multiyear grant may be required to send representatives to a briefing session to review the policies and procedures that apply to their project. Federal funds would be available to pay travel expenses.

State Library staff and peer advisors will monitor multiyear grant activities. Each recipient must submit quarterly reports and reimbursement requests. Monitoring activities will include a mid-year site visit each year to the library to determine whether or not the project is being implemented as proposed. The visitors will also work with the grantee to determine whether the project is likely to meet designated milestones as well as to identify any signs of problems.

Successful grantees will be given approval to proceed to “apply” for continuation the next year. If a project appears to have problems, project staff will be alerted that approval of a subsequent year of funding is in jeopardy. Grantees will have several months to make adjustments in their project before their next year's application is due.

If a grantee is approved for the subsequent year, the library will be asked to provide a simplified application for the next year that includes a report on progress to date, key outcomes for the upcoming year, and an updated timeline with an adjusted budget, etc. The application deadline will be later than customary for first-time applicants and will be considered in the funding pool with first-time applications. As noted above, if project monitoring shows that management and progress are satisfactory, the project would be a priority for continued funding.

8. Major Changes to Projects. If the grantee wishes to propose a major shift in the project at the end of the first or second year, the grantee would consult with State Library staff as to whether the project could be continued or would be considered a new project, which would require a new, full application. The State Library staff would consult with the Advisory Committee and peer advisor(s) before making a final decision.
9. Funding for Continuing Projects. If a library applies in 2004-2005 for a multiyear grant that includes significant components from previous single year projects, the application must show evidence that the project will be sustainable past the life of the grant. Projects that have not received funding in the past may receive a higher priority in the first year of implementing multiyear projects.
